

Range of direct driven backward curved centrifugal cabinet fans designed for smoke extraction in fire conditions and certified F400-120 (CE marked). The casings are manufactured from a robust galvanised frame work combined with panels lined with 25 mm thickness of fireproof fibreglass acoustic insulation (M0). All models incorporate F400-120 rated motors approved to operate continuously (S1) and in emergency situations (S2). Available, depending upon the model, with three phase motors in 4, 6 or 4/8 poles.

Motors

All the motors are IP55 Class H insulation. Electrical supply.

Three phase 230/400V-50Hz up to 3 kW.
Three phase 400V-50Hz, for higher power motors and two speed motors).

Specific applications

Officially approved to EN12101-3 standard.
Certificate n° 0370-CPR-2475

Car parks

Commercial and industrial kitchens

Versatile design

Backward curved centrifugal impellers

To avoid the accumulation of dirtiness or grease.
Dynamically balanced according to ISO 1940 standard.

Approved motor S1 and S2

F400-120 rated motors approved to operate continuously (S1) and in emergency situations (S2).

Tight cabinet

Condensation drain holes to eliminate condensed water.

Easy to install

All fans are fitted with rigid framework with lifting rings to ease the installation on floor or ceiling.

Low noise level

Panels manufactured from galvanized sheet steel lined with fireproof acoustic insulation (M0), to reduce significantly the radiated noise.

Anti-vibration mounts

To reduce vibration and noise transmissions to the installation.

Robustness

Quality finishing, with aluminium corners providing a high robustness.

TECHNICAL CHARACTERISTICS

Before installation check that the product electrical characteristics listed on the data plate label (voltage, power, frequency, etc.) match those of the intended electrical supply.
