

Ventiladores centrífugos in-line para conducto rectangular, de bajo perfil, fabricados en chapa de acero galvanizada, tapa para inspección y limpieza, caja de bornes remota, estanca IP55, ventilador centrífugo de álabes hacia adelante equilibrado dinámicamente y motor IP55, Clase F, con rodamientos a bolas de engrase permanente y protector térmico incorporado.

Motores

De 4, 6 u 8 polos, según versiones. Regulables por variación de tensión. Modelos trifásicos regulables por convertidor de frecuencia. Tensión de alimentación
Monofásicos 230V-50Hz
Trifásicos 230/400V-50Hz
(Ver cuadro de características)

Para versiones ATEX, ver Serie ILT ATEX

Fácil montaje
Los soportes en las esquinas facilitan la instalación.

Caja de bornes remota, estanca IP55
Facilita la instalación y mantenimiento.

Tapa de inspección
Facilita el mantenimiento.

Solución de ventilación
Ventilador in-line ILB/ILT montado conjuntamente con una caja filtrante IFL, un atenuador acústico IAA, un acoplamiento elástico IAE y una batería de calefacción eléctrica IBE.

CARACTERÍSTICAS TÉCNICAS

Es imprescindible comprobar que las características eléctricas (voltaje, intensidad, frecuencia, etc.) del motor que aparecen en la placa del mismo son compatibles con las de la instalación.

| Modelo | Dimensiones nominales de conducto (mm) | Velocidad (r.p.m.) | Potencia absorbida máxima (W) | Intensidad absorbida máxima (A) | | Caudal máximo (m³/h) | Nivel de presión sonora* (dB(A)) | Temperatura mínima y máxima de trabajo (°C) | Peso (kg) | Regulador de tensión opcional | Convertidor de frecuencia opcional |
|---------------------------|--|--------------------|-------------------------------|---------------------------------|---------|----------------------|----------------------------------|---|-----------|-------------------------------|------------------------------------|

CARACTERÍSTICAS ACÚSTICAS

Espectro de potencias acústicas en dB(A), por banda de frecuencia, en aspiración, descarga y radiado, en 4 puntos de trabajo de la curva característica (A, caudal máximo). Los niveles sonoros indicados en las curvas son presiones radiadas, medidas a 1 metro, en campo libre.

CARACTERÍSTICAS ACÚSTICAS

Espectro de potencias acústicas en dB(A), por banda de frecuencia, en aspiración, descarga y radiado, en 4 puntos de trabajo de la curva característica (A, caudal máximo). Los niveles sonoros indicados en las curvas son presiones radiadas, medidas a 1 metro, en campo libre.

CARACTERÍSTICAS ACÚSTICAS

Espectro de potencias acústicas en dB(A), por banda de frecuencia, en aspiración, descarga y radiado, en 4 puntos de trabajo de la curva característica (A, caudal máximo). Los niveles sonoros indicados en las curvas son presiones radiadas, medidas a 1 metro, en campo libre.

CURVAS CARACTERÍSTICAS

- q_v = Caudal en m^3/h y m^3/s .
- p_{sf} = Presión estática en mmcda y Pa.
- Aire seco normal a 20°C y 760 mmHg.
- Ensayos realizados de acuerdo a Norma ISO 5801 y AMCA 210-99.

CURVAS CARACTERÍSTICAS

- q_v = Caudal en m^3/h y m^3/s .
- p_{sf} = Presión estática en mmcda y Pa.
- Aire seco normal a $20^\circ C$ y 760 mmHg.
- Ensayos realizados de acuerdo a Norma ISO 5801 y AMCA 210-99.

Curvas a diferentes tensiones obtenidas con un regulador electromecánico por transformador.

CURVAS CARACTERÍSTICAS

- q_v = Caudal en m^3/h y m^3/s .

ACCESORIOS DE MONTAJE

IFL-G4
Cajas filtrantes con filtros IFR-G4 incorporados
 Fabricadas en chapa de acero galvanizado.
 Con brida rectangular estándar.
 Puerta de acceso que facilita el cambio de filtro.
 Pueden suministrarse en cualquier posición.
 Temperatura máxima de trabajo hasta 80°C.
 Máximo diferencial de presión recomendado:
 200 Pa.

| Modelo | A | B | C | Peso (kg) | Filtro |

IFR-F
Filtros para instalar en Cajas Filtrantes IFL-F

Filtros IFR-F5
 Clase de filtro tipo F5 (EU5).
 Máxima temperatura de trabajo 80 °C.
 Máximo diferencial de presión recomendado 450 Pa.

Filtros IFR-F6
 Clase de filtro tipo F6 (EU6).
 Máxima temperatura de trabajo 80 °C.
 Máximo diferencial de presión recomendado 450 Pa.

Filtros IFR-F7
 Clase de filtro tipo F7 (EU7).
 Máxima temperatura de trabajo 80 °C.
 Máximo diferencial de presión recomendado 450 Pa.

Filtros IFR-F8
 Clase de filtro tipo F8 (EU8).
 Máxima temperatura de trabajo 80 °C.
 Máximo diferencial de presión recomendado 450 Pa.

Baterías eléctricas

Ver información completa en las páginas de Baterías Eléctricas de la División de Calefacción.

IBW

Baterías de agua caliente

Fabricada en chapa de acero galvanizado.

Tubos de cobre.

Rejas de aluminio.

Con bridas rectangulares.

Pueden ser montadas en posición horizontal o vertical.

Máxima presión del agua: 16 bar.

Máxima temperatura del agua: 110°C (130°C a 10 bar).

Como accesorio: Caja filtrante y interruptor de presión para reducir y controlar la suciedad de la batería.

ACCESORIOS DE MONTAJE

Baterías de agua caliente IBW.
Diferencias de temperatura entre el aire saliente y entrante.
Curvas de pérdida de carga.

ACCESORIOS DE MONTAJE

PWW
Kit de montaje completo para batería de agua
 Para más información ver "Accesorios eléctricos".

ACCESORIOS ELÉCTRICOS

RMB/RMT
Reguladores de velocidad electromecánicos monofásicos (RMB) y trifásicos (RMT).

DPS 2-30
DPS 10-100
Presostatos para comprobar el buen estado de los filtros o de las baterías.
 - DPS 2-30: desde 20Pa hasta 300Pa
 - DPS 10-100: desde 100Pa hasta 1000Pa monofásicos.

LM-230A
Servomotor para compuertas.

Reguladores para baterías eléctricas
TTC-2000
TTC-2000 + TTS-1

TTC-40F + TTS-4
Reguladores electrónicos para baterías trifásicas. El TTC-40F necesita un sensor de temperatura externa para controlar la batería [TG-K300 ó TG-R530].

Sondas de temperatura
TG-K330 de conducto.
TG-R530 de ambiente.

Para más información ver accesorios eléctricos.
